IDEAL BREASTS

There have never been more options for women considering cosmetic breast augmentation surgery.

Dr. Michael Miroshnik,
plastic and cosmetic surgeon

A woman's breasts signify femininity, beauty and youthful vitality. For some, however, a lack of volume or shape can be a concern. For others, pregnancy, weight fluctuation or ageing has changed their breasts, affecting confidence and self-image.

There have never been more options available for women considering the procedure, both in terms of implants available and surgical techniques used.

There are numerous options, both in terms of the surgical techniques employed as well as the implants that are available, including the new breed of vulcanised polyurethane ones.

Dr Michael Miroshnik is an industry leader in cosmetic plastic surgery of the breast, specialising in the most advanced surgical techniques to achieve beautifully natural-looking results. Dr Miroshnik's outstanding surgical expertise, combined with his keen eye for beauty, ensures that each woman gets the best result possible.

When it comes to achieving a beautiful, balanced and natural-looking result, careful pre-operative planning, implant selection and meticulous operative technique are key ingredients to success.

Precise measurements are balanced with an artistic appreciation of the breast form, so that important decisions can be made about the appropriate implant, correct technique and choice of incision, as well as the position of the breast pocket. Dr Miroshnik also performs breast reductions, as well as breast lifting and nipple modifications.

If you are looking to enhance or change any aspect of the appearance of your breasts, a consultation is highly recommended.
